

# Mustela

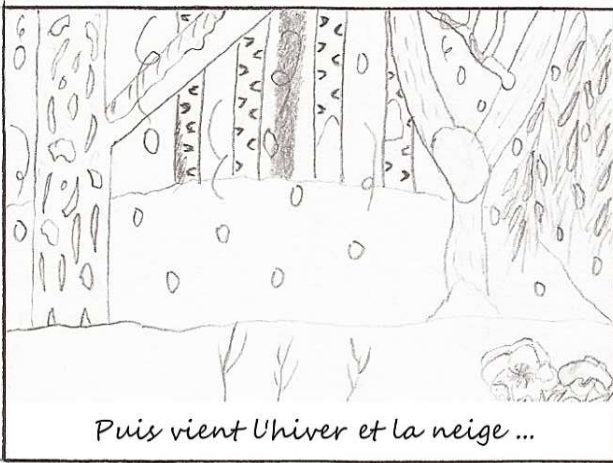

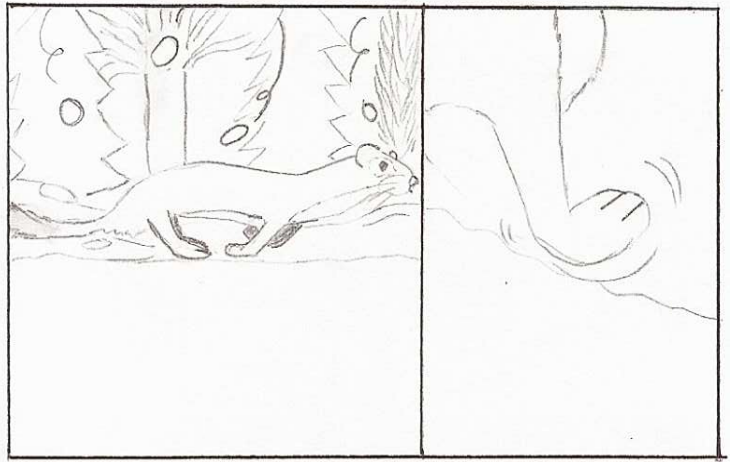

Ouf, sauvée!

Puis vient l'hiver et la neige ...

Voici Hermine, la cousine de Mustela !

Elles se ressemblent  
mais Hermine devient blanche en hiver.

Qui se ressemble, s'assemble !

# Les animaux de la forêt

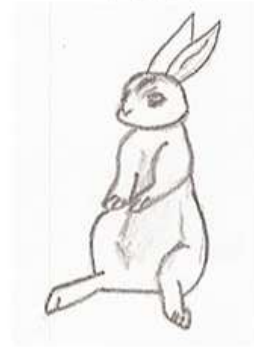

La belette :  
*Mustela nivalis*

La taupe, chassée par la  
belette jusque dans son  
terrier

La chouette effraie :  
prédateur occasionnel de la  
belette

Le lapin, proie de la belette,  
malgré sa taille

L'écureuil : "fait de l'ombre  
avec sa queue" (étymologie)

Le pic épeiche :  
oiseau particulier car il ne  
chante pas pour marquer son  
territoire

L'hermine : semblable à  
la belette mais devient  
blanche en hiver

Le hérisson
